RE: APPLICATION FOR COMPUTER LAB EQUIPMENT/ ACCESSORIES

St. Christopher Mashake Secondary School is a day rural school with 343 learners comprising 177 boys and 166 girls, located in Jambezi area of Hwange West District. There are 5 female teachers and 10 male teachers.

Computers and computer literacy will indeed be a game changer for St. Christopher Mashake Secondary School as the school will be connected to the global village where access to digital resources and literacy has become an integral part of the teaching and learning process. This would blend well with the Church's mission to turn the institution into a high school authority which has already been granted by the Ministry of Primary and Secondary Education. Amongst some of the fundamentals would be:

Enhancing Learning and Teaching

- Access to information. Students can explore digital libraries, educational websites and on-line videos to deepen their understanding of subjects.
- Interactive Lessons. Teachers can use simulations, animations and educational games to make learning more engaging.
- Personalized Learning Software can adapt to each student's pace and style, helping struggling learners catch up and advanced learners move ahead.

Building Essential Skills

- Digital Literacy. Students learn how to use word processors, spreadsheets and presentation tools-skills needed in nearly every career.
- Research and Critical Thinking: With internet access, students can conduct research, compare sources and develop analytical skills.
- Technical Skills: Coding, design and data analysis can be taught using specialized programs, preparing students for tech-driven features.

Improving Collaboration and Communication

- Group Projects: Students can collaborate on assignments using shared documents and video calls.
- Teacher Efficiency: Educators can manage grades, attendance, and lesson plans more easily with digital tools.
- Parent Engagement: Schools can communicate with families through email, portals and apps keeping everyone on the loop.

Diocesan Trustees: The Rt. Revd. Cleophas Lunga (Bishop), The Very Revd. Fritz Madida (Dean),
Rev'd Moffat Musasa (Honorary Treasurer). Mr. Lazarus Mwanza (Ex -Officio)

Supporting Inclusion and Accessibility

- Assistive Technologies: Text to speech, screen readers and other tools help students with disabilities participate fully.
- Remote Learning: Computers allow students to learn from home during illness or school closures.

Preparing for the Future

- Career Readiness: Exposure to technology helps students develop skills needed in modern workplaces.
- Creativity and Innovation: from digital art to video editing, students can express themselves in new ways.

Thanking you in advance and hoping our quest will receive your favourable consideration.

Yours faithfully,

pp

Langson Kabome [Headmaster]
